8 Hi

My aunt has bought me the weirdest sweater you can imagine. You'd probably never wear it. At first it seemed the right size. Then I tried it on and I realised it was only big enough for my baby sister, not me. So, you won't see me wearing it either.

- B** It's too small.
- C** It's unusual.

9 Hi

I've finally bought a tablet! So now I'm able to keep in touch with all my friends wherever I am. I can download movies on it, though personally I think the screen's too small for that. As for reading, for me nothing can replace holding a proper book in my hands.

- B** To watch films.
- C** To read.

10 Robert

Last night I went to the restaurant you'd told me about. It's a really nice place. I tried the prawn cocktail as you'd recommended and it was excellent. The mushroom soup was a bit disappointing. However, I have never tasted such delicious seafood risotto. You should try it the next time you go there.

Scott Flansburg – the maths genius

Imagine being able to calculate $385+742-639$ divided by 219 – all in your head in a matter of seconds. Actually, there is a man who can really do that and more. He is Scott Flansburg.

He can subtract, multiply, divide and find square and cube roots in his head instantly without a calculator and has been entertaining people with his maths skills all over America for 20 years.

It all started 40 years ago when, at the age of nine, he discovered his remarkable ability: he was able to solve his teacher's maths question without needing to write down calculations.

Everybody in his hometown in Canada thought that he would become a maths teacher. And in a way he has. He is an edutainer, a person who educates and entertains at the same time. He is dedicated to helping adults and students get over their fear of maths.

Because of his skills, the *Guinness Book of Records* listed him in the category of the "Fastest Calculator" among humans in 2001. He is also the author of *Math Magic for Kids* and *Math Magic*.

Scott has appeared on many television shows all over America, such as *The Oprah Winfrey Show* and *Larry King Live*. But it was after his appearance on Regis Philbin's talk show that he became known as the "Human Calculator".

It is hard to explain how brains like his work. But if you are interested in the subject, you can find out more in the recently published book *The Mathematician's Brain*.
